

# Homeopathic Medicines in Treatment of Cancer

By : Dr. Narinder S. Thethy (Homeopath)

Cancer is a malignant tumor with the production of epithelial cells. These cells consist of morbid growth in the epithelial and connective tissues of the blood vessels and their sheaths. Cancer invades the structure of organs and may fill them with tumors destroying their functions. Metastasis is a cancerous state, in which cancer cells are transferred from the primary location to the different organs through the veins. Cancerous tumors may appear in any part of the body and may be due to a variety of causes, but the major causes are hereditary, abuse of alcohol, blows and falls of all kinds, tuberculosis, cigarette, tobacco chewing, radiation (including sunlight).

Homeopathy is a medical treatment for 'holistic' healing. The whole body should be treated to cure the disease from the root cause. Properly selected and administered homeopathic remedies can cure the cancer. Allopathic or conventional way of cancer treatment include chemotherapy, radiation therapy and surgical removal of the tumors or the whole organ.

The pre-cancerous stage embraces all the countless manifestations of chronic diseases, such as diabetes, psoriasis, eczema, arthritis, asthma, tubercular affections and venereal diseases like gonorrhoea and syphilis, etc.

Cancer cases fall into three groups: (1) Pre-cancer stage; (2) Early or incipient stage (3) Late or advanced stage.

## LEUKAEMIA (BLOOD CANCER):

This is an acute proliferative disease of the bone-marrow, characterized by infiltration with the most primitive form of white cell precursor, the blast cell. White blood count greatly increases in leukaemia. Leukaemia can be transmitted by a virus. Unnecessary radiation should be avoided in pregnant women because it can cause acute leukaemia in their children after birth. It can be acute or chronic. The cancerous blood cells can grow and lodge in any site, and the spleen, liver, lymph nodes and other organs may be enlarged with leukaemia cells. It can be diagnosed by bone-marrow test. Weakness, fever, bleeding and bruising may occur.

## CANCER OF THE BREAST:

It is the most common cancer in women and is a common fatal disease. It can be diagnosed by

biopsy or mammography. Its scirrhus, roundish tumor may appear deep in the breast or nearer the surface, which draws the region of nipple inward. Scirrhus tumors can be in one breast or both, with sharp or burning pains.

Dr. Narinder S. Thethy  
(Homeopath)

The open ulcer discharges profusely an offensive (smelly), thin, pus-like discharge, or it can bleed easily.

## UTERUS / CERVIX CANCER:

Uterus (endometrial) cancer involves the lining of the uterus. Hormones play an important role in its cause. Other causes are diabetes, obesity, late menopause, and infertility. Cancer of the cervix (that limited to the lining), seem to be related to factors of the sexual behavior. Women with multiple sexual partners, particularly during their teens, are at high risk. Cervical cancer can cause vaginal bleeding, vaginal discharge and painful intercourse. Pap smear test can diagnose the disease.

## Symptoms:

Its most important symptoms are – heavy, continuous uterine bleeding; watery, itchy, burning, smelly leucorrhoea discharges; sharp pains in the lower back, loins and groins. This destructive cancer can extend to the ovaries, vagina, bladder and rectum. Many ovarian tumors produce large amounts of fluid that accumulates in the abdomen and will eventually cause swelling, distension, shortness of breath and weight loss.

## CANCER OF THE STOMACH OR INTESTINES:

There are different forms of cancer of the stomach like scirrhus fibrous growth, Carcinoma medullaris – round lumps in the mucus membrane of the stomach; and Carcinoma alveolaris – jelly like growth

## HUMAN HEALTH

which penetrates in the peritoneum and forms a large tumor. Stomach ulcer and erosion of smaller or larger blood vessels can cause continuous bleeding. Same types of cancer can be found in the intestines. The cancer of stomach kills more people than cancer in any other part of the body.

## Symptoms:

Pain in the stomach with loss of appetite; vomiting; bleeding from the stomach; tumor in the pit of the stomach; pale skin, wrinkled, dry, peeling off scales especially from the lower legs; weight loss; sunken eyes; ankles edema (swelling); diarrhoea and septic pneumonia.

## CANCER OF THE RECTUM:

It is characterised by swelling of the hemorrhoidal veins (piles) with occasional bleeding. Sacral pain extends down to the thighs. Tumors are formed, which suppurates and can be felt in the rectum. Bursting of the blood vessels can cause profuse bleeding with stool. Cancers of the rectum and colon (ulcerative colitis) are very common. Diarrhoea or constipation with frequent passage of mucus often tinged with blood is common in the cancer of rectum.

## TONGUE CANCER:

It is epithelial type of cancer, which appears as a hard lump, usually at the edge near the tip of the tongue which after a while, forms an ulcer. This ulcer can be with some discharge which emits a terrible smell with cutting, boring or burning pains especially at night. Pre-cancerous causes may lead to carcinoma later on, they are: dental ulcer; chronic superficial glossitis; syphilis etc.

## Symptoms:

The tongue is swollen and painful; the motion of the tongue is difficult; saliva is present and the patient spits all the time; glands under the tongue are swollen; lymphatic glands of the neck becomes swollen and hard.

## PROSTATE CANCER:

It causes many deaths in men. Retarded urination, frequent urination, burning, dribbling, or burning in the urine are the most common symptoms.

Other types of cancer include, cancers of the Skin; Brain (tumor); Genitals; Hodgkin's disease; Oesophagus; Lips; Liver and Jaws. All these can be treated by homeopathy. Remedies should be prescribed by a homeopathic physician, who can track the patient's progress.

There are numerous homeopathic remedies for cancers, few are mentioned here: **Apis, Arsenicum, Bromium, Carbolic acid, Carb-An, Carcinocin, Conium-mac, Hydrastis, Kreosotum, Lachesis, Lycopodium, Merc., Nit-Ac., Phosphorus, Phytolacca, Silicea, Sulphur, Thuja** etc.

HOMEOPATHIC TREATMENT is composed of:

### 1. CONSTITUTIONAL REMEDIES:

Constitutional remedies are quite often prescribed to cancerous and pre-cancerous patients in the first place. They are based on all the symptoms of the patient.

### 2. CANCER REMEDIES: There are many homeopathic remedies, which has undeniable action on cancer as well as on general state of health. This state can be with burning pains or pricking (needles) pains.

### 3. DRAINAGE OR CANALIZATION REMEDIES:

In this form of homeopathic treatment of cancer, we must neutralize the toxins spread in the body.

In homeopathy, we encourage people who have a family history of cancer to seek constitutional homeopathic treatment. A number of cases have been cured after prolonged and careful treatment with a number of homeopathic remedies. The treatment period varies according to the severity of the case. Some cancer patients turn to homeopathy when it is at very advanced stage. Curing is very rare in advanced cases. Remedies are selected based on totality of the symptoms of the patient. These remedies work by stimulating the body's own healing power (immune system). Homeopathic remedies are always safe, always effective. In homeopathy a patient is treated as a whole. He (patient) has to disclose all his diseases and feelings from head to toes.

Homeopathy is, indeed, the only available curative treatment for chronic diseases (equally effective in acute diseases) like obesity, arthritis, gout, asthma, diabetes, bronchitis, stomach ulcers, colitis, constipation, diarrhoea, gonorrhoea, syphilis, herpes, impotency, skin diseases, high blood pressure, migraine, piles, sleeplessness, fear, anxiety, depression, abuse of alcohol or narcotic drugs etc.

LADIES PROBLEMS: Pelvic inflammatory diseases (P.I.D.), infertility, inflammation of the fallopian-tubes, vaginal discharges, menstrual disorders, continuous heavy bleeding, dryness or painful sex, itching, cysts / fibroids, lack of sexual desires are also cured.

Dr. Narinder (Homeopath) can be reached at the Homeo Cure Clinic along Nagara road near Fig Tree Hotel on Tel: 020 3755111, 0722 722105, 0733 541708.
